

IN THE SPECIFICATION

Please insert the following paragraphs on page 21, before the paragraph beginning with the sentence “A further possible embodiment....”

Another modification shown in Figure 13A provides a multi-compartmental cage structure 100 comprising opposed side walls 110 and 120 connected by opposed end walls 130 and 140 and at least one pivotally connected partition wall 150. The at least one partition wall 150 separating individual compartments 160 of the cage 100. The cage structure 100 further comprises a façade 200 in the form a secondary cage structure comprising opposed side walls 210 and 220 connected by opposed end walls 230 and 240 and at least one pivotally connected partition wall 250. The façade 200 can accommodate a surface effect material 270 and comprises a material which permits viewing of the surface effect material when thus accommodated. Preferably, the end wall 230 of the façade 200 may define a cover panel that comprises a material which permits viewing of the surface effect material 270.

In another modification shown in Figure 13B, the cage structure 100 further comprises an insert 300 in the form a secondary cage structure comprising opposed side walls 310 and 320 connected by opposed end walls 330 and 340 and at least one pivotally connected partition wall 350. The insert 300 can accommodate a surface effect material 370 and comprises a material which permits viewing of the surface effect material when thus accommodated. Preferably, the end wall 130 of the cage structure 100 and the end wall 330 of the insert 300 comprise a material which permits viewing of the surface effect material 370.
